“The pace of innovation and change in modern veterinary medical education has never been greater and the Journal of Veterinary Medical Education is a unique resource for the sharing and dissemination of that new knowledge.” Dr. Daryl Buss, Editor-in-Chief

The Journal of Veterinary Medical Education (JVME) is the peer-reviewed scholarly journal of the Association of American Veterinary Medical Colleges (AAVMC). As an internationally distributed journal, JVME provides a forum for the exchange of ideas, research, and discoveries about veterinary medical education. This exchange benefits veterinary faculty, students, and the veterinary profession as a whole by preparing veterinarians to better perform their professional activities and to meet the needs of society.

The journal’s areas of focus include: best practices and educational methods in veterinary education; recruitment, training, and mentoring of students at all levels of education, including undergraduate, graduate, veterinary technology, and continuing education; clinical instruction and assessment; institutional policy; and other challenges and issues faced by veterinary educators domestically and internationally. Veterinary faculty of all countries are encouraged to participate as contributors, reviewers, and institutional representatives.

JVME ONLINE

**JVME Online** is the comprehensive source for the latest in veterinary education research, review and commentary and provides all the essential features that users look for in an electronic resource, including:

**Early access to the latest issues** - Did you know that most online issues are available to subscribers up to two weeks in advance of the print version? Sign up for e-mail alerts and you will know as soon as the latest issue is ready for you to read.

**Advance Online** - Articles published online ahead of print issue publication have become a staple in many fields where new research is being published at a fast rate. Articles accepted for publication are now copy-edited, typeset, and posted online immediately through **JVME Advance Online**. With this new initiative, advance versions of articles will be available online within weeks rather than months of final manuscript submission.

**Everything you need at your fingertips** - search through current and archived issues from the comfort of your office chair instead of digging through book shelves or storage boxes. The easy-to-use search function allows you to organize results by article summaries, abstracts or citations. You can also bookmark, forward reference link through DOI or CrossRef, export, and print a specific page, chapter or article.

**Enhanced features not available in the print version** - supplementary information, color photos, videos, audio files, etc. encouraging further exploration and research.

Have an innovative teaching technique, research finding or idea for a focus/theme issue? **JVME** is looking for fresh ideas and submissions from all areas of veterinary education.

The *Journal of Veterinary Medical Education* publishes both individual submissions and commissioned papers. Individual submissions are encouraged in any area pertinent to veterinary education. They may include "Educational Research Reports," "Reports of Innovations in Veterinary Education," or Commentaries on aspects of or issues affecting veterinary education. We also welcome reports from other areas of health sciences education that may be pertinent to veterinary education as well as suggestions for special theme sections and issues. Contact us today at jvme@aavmc.org for more information.
